## BIO

---

Lyandrea (elle [EH'-jeh]) is a multifaceted artist of Broiken ancestry. Elle's work cultivates a depicted line of utter internal expression through artistry. Driven by a passion for social change, Lyandrea's works focus on queer theory, environmental change, and societal injustices.

Elle's art comes from a larger source; through conscious and unconscious movement. Visions of art come from a thought, idea, or through meditation. Their art conveys love, light, empathy, and unity, with a ruling objective to connect with the individual by pouring their desires and frustrations with society into each piece. With a desire to reach a global audience, elle seeks a strong platform that can amplify their voice and foster meaningful connections.
